

REMARKS

Amendments to Specification

The Title and Summary of the Invention are amended to be consistent with the claims.

Terminal Disclaimer

The attached terminal disclaimer overcomes the obviousness type double patenting rejection. Because the Examiner found no other basis for rejecting the claims, all claims now should be allowable.

Amendments to Claims 45, 47, 49 and 51

Claims 45 and 47 are amended to correct a typographical error. In line 14 of each claim, "is attached" is deleted because it is redundant with the word "attaching" at the beginning of the paragraph.

Claims 49 and 51 are amended to change "and" to "end" to correct a typographical error.

Newly Added Claims 53-55

Newly added claims 53-54 differ from claims 49-50 in only two respects: (1) The step of attaching the first end of each side wall segment is deleted. Instead, the steps of providing the first and second side wall segments include a recitation that the first end of said segment is attached to the gas distribution plate. (2) The two "bending" steps are changed to "forming a bend". Because there are no other differences between claims 53-54 and claims 49-50, claims 53-54 should be allowable for the same reasons that claims 49-50 are allowable.

Claim 55 is supported by the disclosure of the rectangular configuration in Figures 2, 3, 6, 8 and 11. Claim 55 should be allowable because it is dependent on claim 53.

Respectfully submitted,
